

Investing Intelligence into Innovation

iIntelliSys, a byword for IT intelligence, answers the IT needs of medium-size businesses by providing them with the contemporary IT impetus to outperform in today's highly competitive market. A business-friendly approach at iIntellisys marks a departure from that of other IT companies, which overcomplicate their business methodologies for the sake of profit. We keep our business practices and methodologies a commutable affair between the client and us.

ABOUT US

iIntelliSys is an offshore facility located in Pune, the IT hub of India. The city is also a huge talent pool to draw from. We have brought the best minds under the banner of iIntelliSys. Our technical expertise covers wide range of services like Web Design and Development, Animation (2D & 3D), Software Support and Maintenance, Internet Marketing. All this is bolstered with modern infrastructure to ensure that the business operations are carried out seamlessly.

We have a highly experienced team of developers who make our claims stand firm. Our professionals go through a rigorous selection process that tests their analytical abilities and technical skills. Once recruited, they undertake an in-house project and based on their performance, are deployed on a client's project. Thus, with right selection and mentoring, each employee turns out to be a highly productive resource for the company as well as the client.

IT Services

Our IT services imbibe the latest technologies and industry practices in IT. We back medium businesses that face stiff competition from the large scale establishments. This we do within a start-up budget without compromising on the value of our deliverables. We have devotedly applied ourselves to deliver services that stand at par with those of the big players in IT industry.
